Chima Nwagu

Skills

- Communication and Interpersonal Skills
- Agile Software Development
- Version Control Systems: Git, Github
- Front-End Programming: HTML5, CSS3, AJAX, React, NextJs, Redux
- Back-End and Database Skills (NodeJs, NestJs, MongoDB, PostgresSQL, MySQL)
- User Acceptance Testing
- Full Software Development Lifecycle
- Technical Documentation
- UI Updates
- Problem-Solving
- Usability Testing
- Javascript Libraries and Frameworks (TypeScript)
- Jira and Confluence
- Team Leadership
- Responsive Web Design

Education And Training

10/2018
Bachelor Of Science:
Accounting
University Of Benin
Edo, Nigeria
I am a Full-stack Software Developer with years of experience building and creating innovative solutions to real-world problems. I have worked on node js restful API projects with Express, NestJs,

Summary

Experienced front-end developer with a strong portfolio of creating visually appealing and user-friendly websites and web applications. Proficient in HTML, CSS, JavaScript and popular front-end frameworks such as React and React Native. I also have experience with Nodejs and Python. Strong understanding of responsive design, cross-browser compatibility, and web performance optimization. Proven ability to work collaboratively with designers, developers, and stakeholders to deliver projects on-time and within budget. Dedicated to staying current with industry developments and continuously improving skills to create engaging and high-quality user experiences.

Experience

Pericius - Frontend Developer
Nigeria
11/2022 - Current

- Created successful websites that met requirements for objectives such as load speed and design.
- Improved and designed new layouts to achieve usability and performance objectives.
- Applied innovative approaches to software design through creative inception and planning.
- Delivered end-user training on content management systems allowing staff to make easy updates and maintenance to website without developer assistance.

Reliance HMO - Frontend Developer
Lagos, Nigeria
02/2022 - Current

- Using react and various other frontend tools to build and maintain the admin dashboard
- Https://admin.reliancehmo.com
- Created successful websites that met requirements for objectives such as load speed and design.
- Performed testing on user-defined functions and triggers.
- Created documentation for new applications to support end-users.
- Reviewed and made refinements in existing programs to improve

and GraphQl on the backend, and React with typescript and nextJs on the frontend. In my spare time, I enjoy reading, watching football, playing video games, and I enjoy sh farming

techniques.
- Applied innovative approaches to software design through creative inception and planning.

Max.ng - Backend Developer
Lagos, Nigeria
01/2022 - 03/2022

- Coded, tested and developed solutions in alignment with project requirements.
- Wrote reusable, testable and efficient code using NestJs and Nodejs.
- Performed code review for peers and provided recommendations for improvements.
- Tested and resolved problems with software functionality and recommended improvements to applications.
- Kept detailed documentation on test plans, procedures and end results.
- Translated concepts into user flows, wireframes, mockups and prototypes to promote positive intuitive designs, site interactions and user experiences.

Decagon Institute - FullStack Developer
Lagos, Nigeria
10/2019 - 01/2022

- Worked as a full-stack developer, using Node with Express on the backend, and React on the frontend
- I primarily use typescript for most of my projects
- Managed both back-end and front-end aspects of development process.
- Built professional relationships with team and clients to help speed communication and attain project results.
- Led technical team to meet project deadlines and attain project objectives.
- Supported systems and complex software applications at multiple client sites.
- Produced high-impact, user-friendly websites that accomplished all business goals.
- I also use Nestjs on the backend and Nextjs on the Frontend

Zenith Carex International - Full Stack Engineer
Abuja, FCT-Abuja
10/2019 - 10/2020

- Collaborated with design teams to develop data structures and system architecture.
- Installed front-end and back-end software applications and performed bug fixes.
- Translated concepts into user flows, wireframes, mockups and prototypes to promote positive intuitive designs, site interactions and user experiences.

- Determined job priorities for multiple projects and communicated sequencing, priorities and timelines to entire team.

Activities And Honors

- Volunteer software developer with the United States of Africa, a non profit organization looking to build innovative software for africa development.

Projects

Realtor-clone:
Technologies: REACT | FIREBASE | TAILWIND | REDUX | LEAFLET | GOOGLE GEOCODING API | MOMENT | TOASTIFY | REACT ROUTER
Realtor react is a real estate project mobile first web app, showing listings for a real estate company in Nigeria, Abuja. It was built with Reactjs, Tailwindcss and firebase. Map functionality was added using google Geocoding API and leaflet to show specific location of the properties.
URL: https://realtor-cn.vercel.app GITHUB: https://github.com/NwaguChima /realtor_react

Natours:
Technologies: NODEJS | EXPRESS | TYPESCRIPT
Natours is a tour backend project, that basically shows tour experience of users. Complete authentication was implemented, so as pagination, optimized indexing and other amazing API features.
GITHUB: https://github.com/NwaguChima/ts-Natours

TechNotes:
Technologies: React, Redux, RTK query, Nodejs, MongoDB
Built a technote Full stack site, that helps a business document internal processes using the awesome rtk query on react and nodejs to esure optimal performance.
Github: https://github.com/NwaguChima/techNotes-Client, https://github.com /NwaguChima/techNotes_API

SpotifyPlay:
Technologies: Nextjs, Tailwind CSS, Atom, Typescript
Built an audio player using the spotify api and reacreated a beautiful music player.
Github: https://github.com/NwaguChima/sportify_nextjs_ts

React_dashboard_panel:
Technology: (REACT | TAILWIND | SYNCFUSION | CONTEXT API):
https://cn-admin-dashboard.netlify.app/
The most amazing admin dashboard, using syncfusion. It includes tables with full functionalities (sort, filter, edit, etc...), Calendar, Kanban, and Color picker among many things were implemented. Charts including pie, bar, financial, and many more were also implemented.

Github: https://github.com/NwaguChima/dashboard_panel

grahpql-ecommerce:

Technologies: GraphQL | REACT | SCSS | APOLLO | CONTEXT

Built the product page and full cart implementation on an e-commerce website. Currency toggle was also implemented, including over 85 country currencies and rates.

Github: https://github.com/NwaguChima/graphql-Ecommerce
